## Preliminary Call for Papers

The IEEE Midwest Symposium on Circuits and Systems "MWSCAS" is the oldest Circuits and System Conference in the world. The 2003 MWSCAS is hosted by The Arab Academy for Science and Technology (AAST) in Cairo, Egypt. The symposium is devoted to all aspects of theory, design and applications of circuits and systems. Emphasis is on current and future challenges in these areas as well as their interdisciplinary impact. Topics may include but are not limited to:

◊ Analog VLSI & Signal Processing
◊ RF Circuits & Systems
◊ Mixed Signal Circuits & Systems
◊ Systems on a Chip & Embedded Systems
◊ Low Power Circuits & Systems
◊ High Speed & Finite Field Arithmetic
◊ VLSI Circuit Design & Testing
◊ CAD Methods & Systems
◊ Programmable Logic
◊ Communication Networks & Wireless
◊ Networks & Internet Security
◊ Neural Networks & Control Systems
◊ DSP, Image Processing & Video Processing
◊ Power Systems & Power Electronics
◊ NEMS, Sensors & Nanotechnology
◊ Biomedical & Bioinformatics Systems
◊ New & Innovative Technologies

Prospective Authors of papers describing original work in the above fields are invited to submit a 1000 word summary of their papers for consideration (by April 15, 2003). Electronic submission in PDF or post script format is recommended. Proposals for special sessions and tutorials are due by March 30, 2003. Check with the conference website: http://mw003.aast.edu. for further details.

Besides the technical program, a very entertaining, cultural and social program is planned. It will introduce the symposium attendees and their guests to a seven thousand years journey. Cairo is served by all international airlines from all continents.
